The HeskaView™ Digital Telecytology Advantage

Provide better diagnosis and treatment for difficult or time-consuming cases.

- Elevate standard of patient care
- Expedite client communication
- Eliminate delays in slide review
- Move on to next step diagnostics and treatment quickly

Average turnaround of 24 hours or less.

Add a specialty service to your practice without hiring a specialist!

Digital telecytology allows timely access to veterinary clinical pathologists who can assist with diagnostic evaluation of your patients. Whether you are a cytology novice or expert, the board-certified pathologists at HeskaView Specialty Services can help with everything from CBC pathology review to presurgical planning, and more...

Start diagnosing at the speed of digital today.
